### **Employment History**

- 2005, Katnich Dodd, Building Surveyor
- 2003 — 2005, City of Adelaide

### **Building Surveying Experience**

Frank's experience in the building industry commenced in 2003 when he joined Adelaide City Council as an Assistant Building Surveyor. He gained invaluable Local Government experience including a thorough understanding of local government development approvals processes. Adelaide has a mix of old and contemporary buildings and a complexity of site issues unique to the metropolitan area which provides building surveying experience that can not be obtained at even the largest or busiest metropolitan councils. Frank worked on the full range of developments from domestic and commercial projects as well as regulatory control and community liaison.

Since Joining Katnich Dodd, Frank has been working on both expanding and consolidating his building surveying knowledge and experience in both the domestic and commercial field through extensive involvement in a wide range of projects. His enthusiasm and commitment to his work has seen Frank quickly become a valued part of the Katnich Dodd Team.
