Building Surveying Experience

Ian has thirty years experience in the construction industry in the areas of construction, design, contract administration and regulatory control. He has been involved in all facets of development control including strategic planning and legislative review as well as the assessment of development applications ranging from residential to multistorey commercial, retail and institutional buildings.

Since forming Katnich Dodd, Ian has acted as a building surveying consultant on thousands of projects from project homes to multi-storey commercial buildings and the majority of South Australia's major infrastructure developments.
