

Katnich Dodd is the leading South Australian building surveying consultancy.

KATNICH
DODD

The Company

Since 1995, Katnich Dodd has been the leading South Australian building surveying consultancy. Our consultants are eminent in their field and have extensive experience in both the private and government sectors.

Katnich Dodd's reputation for professional and personalised service is based on:

- > a commitment to technical excellence
- > a value adding pro-active approach to building surveying
- > a strong customer service focus

The ISO9002 quality accreditation of our building surveying and private certification operations assures our quality and consistency. No matter how big or small the project, our building surveying consultancy provides a guarantee of superior service.

Mission

- > To provide a building surveying service offering unprecedented levels of professionalism, efficiency & effectiveness.
- > To ensure that building certification is a value adding component of the design / documentation stage.
- > To create the most highly respected building surveying consultancy in our market.
- > To always meet or exceed our customers' expectations.

Services

Katnich Dodd offers the following professional services:

- > Building surveying consultancy
- > Certification of documentation for building consents
- > Certification of Crown developments
- > Technical and legislative advice
- > Free preliminary advice during documentation
- > Liaison with government and fire authorities
- > Building inspections for occupancy and fire upgrading
- > Review of legislation and standards
- > Dilapidation & existing condition survey

The Benefits of Quality Advice

Quality building surveying pays dividends in terms of cost effective construction, reduced legal exposure and positive outcomes for the developer and the community. With building codes and standards in a constant state of change it is only through continual involvement with legislators and industry players that building practitioners can remain at the cutting edge.

Katnich Dodd is focussed entirely on the profession of building surveying. This enables us to provide a quality service and stay at the forefront of technical and legislative change. Our structural and municipal engineering expertise provides us with all of the in-house technical skills required to assess and provide advice on the full range of developments.
